

MOHD ARIF RAINEE

+91-9838113817 arifrainee1@gmail.com [Linkedin](#) [Github](#)

SUMMARY

Software Engineer with expertise in Android development and full-stack application design. Skilled in Kotlin, Java, Android SDK, MVVM, REST APIs, and modern software architectures, with experience building scalable, secure, and high-performance applications.

EDUCATION

Zakir Husain College of Engineering and Technology, AMU, Aligarh **2023 - 2027**
B.Tech - Computer Engineering - CGPA - 8.53 *Aligarh, Uttar Pradesh*

EXPERIENCE

iRAMA (IIT Roorkee)  **Dec 2025 - June 2026**
Mobile Application Developer Intern *Remote*

- Developed a native Android application for citizen complaint registration, tracking, and resolution using REST APIs, Node.js, and MongoDB.
- Implemented real-time route navigation with GPS, hazard-aware path selection, pothole analytics, voice alerts, and live map visualization.
- Integrated Android with ESP32 for real-time hazard notifications, synchronizing warning data to an external display with buzzer alerts through an end-to-end IoT system.

Research Intern (NIT Trichy) **Jan 2026 - June 2026**
Application Security Intern *Remote*

- Performed static and dynamic analysis, debugging, and reverse engineering of Android applications.
- Analyzed application architecture, REST APIs, authentication mechanisms, and system workflows.
- Identified security vulnerabilities and misconfigurations, improving software reliability and security.

NTS Nihon Global  **Jun 2025 - Aug 2025**
Android Developer Intern *Remote*

- Developed and integrated cross-platform software modules using React Native, Firebase, and Clerk Authentication.
- Worked with team members to troubleshoot software issues, debug application errors, and optimize performance.
- Participated in SDLC, performing development, testing, documentation, and maintenance activities.

PROJECTS

Vendorlink  | Kotlin, MongoDB, RESTful APIs, MVVM, JWT, Node.js **April 2026**

- Developed a full-stack Android app, enabling users to discover vendors, browse products, and place orders.
- Integrated REST APIs with Node.js/Express and MongoDB for secure, real-time data synchronization.
- Implemented JWT authentication, user profiles, search, and order tracking for a seamless experience.
- Built responsive UI using MVVM architecture, ensuring scalable and maintainable application development.

Food Delivery App  | Kotlin, Firebase, Retrofit, MVVM **Jun 2025**

- Designed and developed scalable software system using Kotlin and MVVM architecture.
- Integrated backend APIs and database systems for real-time data processing.
- Implemented modular architecture ensuring maintainability and system scalability.
- Debugged and optimized application performance and system efficiency.

Additional Projects:

 Lazzat  PayVoice  Employee Management

TECHNICAL SKILLS

Languages: Kotlin, Java, Python, C++

Frameworks/Tools: Android Studio, Jetpack Compose, React Native, LiveData, Agile/Scrum, Node.js

Database/Backend: Firebase (Firestore, Realtime Database, Authentication), Room Database, MongoDB

API / Networking: REST APIs, Retrofit, Socket.IO, WebSockets, HTTP/HTTPS

Version Control & Build: Git, GitHub, Gradle

Core Skills: Software Development, OOP, Debugging, Troubleshooting, Testing, Code Optimization

CERTIFICATIONS AND AWARDS

- Social Summer of Code 2024: Contributed to open-source software under mentorship. 
- 9th Rank - AMUHacks 3.0: Secured 9th position in a national-level hackathon.
- Google Cloud Training: Completed hands-on labs and courses on Google Cloud Platform.
